# Metropolitan Wastewater

## Mission Statement

To provide the public with a safe, efficient, and cost-effective regional sewerage system to protect the environment, supplement the limited water supply, and meet regulatory standards.

## Department Description

The City's Metropolitan Wastewater Department (MWWD) provides regional wastewater treatment and disposal services for the City of San Diego and 15 other cities and special districts in a 450 square mile area stretching from Del Mar to the north, Alpine and Lakeside to the east, and the Mexican border to the south. The Department is also responsible for operating and maintaining the Municipal Sewage Collection System for the City. MWWD is comprised of five divisions: Administrative Services, Engineering and Program Management, Environmental Monitoring and Technical Services, Wastewater Treatment and Disposal, and Wastewater Collection.

The Administrative Services Division administers the Department's budgets, grant development, safety and training, human resources, information technology, and the collection and analysis of sewage flow data. The Division also manages programs designed to facilitate the Department's mission and strategic planning.

Engineering and Program Management provides long-range master plans for the Metropolitan and Municipal Wastewater System to ensure that repairs and upgrades are planned and implemented in a fiscally sound manner to meet regulatory standards and environmental concerns. Specifically, the Division provides condition assessment, sewer modeling, planning and predesign for pipelines, pump stations and treatment plants, energy management, environmental support, and oversight of the implementation of the Capital Improvement Programs.

Environmental Monitoring and Technical Services (EM&TS) carries out several crucial programs in support of the treatment and disposal of wastewater. These include the Industrial Wastewater Control Program that regulates industrial discharges to the sewers. EM&TS operates a comprehensive ocean monitoring program to evaluate the wastewater treatment plants at Point Loma and the South Bay. The program provides laboratory testing for process control and regulatory reporting purposes, ensures compliance with all regulatory permits, and oversees actions necessary to maintain the permits for the Point Loma Wastewater Treatment Plant and South Bay Water Reclamation Plant. This Division has also obtained the International Organization for Standardization (ISO) Certification.

# Metropolitan Wastewater

## Department Description

Wastewater Treatment and Disposal is responsible for the operation and maintenance of all wastewater treatment facilities including treatment and water reclamation facilities, major pump stations, and biosolids processing. The Division is the first publicly owned wastewater treatment operation in the nation to receive ISO Certification.

Wastewater Collection provides ongoing preventive cleaning, maintenance, and repair of the Municipal Sewerage Collection System, including emergency removal of sewer line stoppages, equipment overhaul and repair, on-site facility inspections, and maintenance of the structural integrity of sewer mains and manholes in the collection system. The construction section of the Division performs repairs and replaces sewer laterals in the public rights-of-way. The Division operates and maintains 76 sewer pump stations as well as the Mission Bay and Coastal low-flow stormwater diversion systems. The Division administers the Food Establishment Wastewater Discharge Permitting Program, which is responsible for permitting and compliance monitoring of food establishments to minimize the discharge of grease into the wastewater collection system. This Division has also obtained the International Organization for Standardization (ISO) Certification.

## Service Efforts and Accomplishments

The Metropolitan Wastewater Department (MWWD) proposes to expand the Bid-to-Goal Contract Operations from two divisions to the entire Department. This efficiency improvement project is compatible with the overall City of San Diego's Business Process Reengineering Program. The Bid-to-Goal Program was developed in MWWD to enhance organizational productivity in order to be competitive with the private market. The Proposed Budget reflects a reduction of 134.30 positions with no negative impact on service delivery to wastewater utility customers.

The Metropolitan Wastewater Department also proposes to expand the Strategic Business Plan to ensure that the ratepayers receive the most effective wastewater services possible. The plan is a 10-year integrated projection of business goals and objectives covering all aspects of infrastructure planning, financing, operations and maintenance, customer service, and high performing work teams. Strategies are developed and reviewed each year in the context of supporting the Department's stated vision and mission as well as the goals of the Mayor and City Council.

The Metropolitan Wastewater Department is in the process of finalizing the Final Consent Decree with the Environmental Protection Agency, thereby avoiding fines and other mandated repairs on the collection system.

The Metropolitan Wastewater Department has made significant strides toward meeting the goals to clean up the beaches and bays and pursue energy independence. Sewer spills were reduced from 316 in Fiscal Year 2001 to 71 as of March in Fiscal Year 2007. This substantial reduction in sewer spills reflects the significant acceleration in sewer pipeline condition assessment, cleaning, repair, rehabilitation, and replacement efforts. The entire 3,000 mile system cleaning program has been completed. In addition, the Centralized Operations Management Network provides the ability to monitor sewage flows into the greater San Diego Metropolitan Sewerage Network from a central control and information center, and promoting greater responsiveness and reliability of the sewerage system.

In support of the goal to pursue energy independence, the Point Loma Wastewater Treatment Plant, the North City Water Reclamation Plant, and the Metro Biosolids Center operate onsite co-generation facilities converting methane gas into electrical and thermal energy. These facilities save ratepayers millions of dollars and provide supplemental power to the grid while reducing dependence on the utility. There is also a hydro-electric facility in operation at the Point Loma Plant which, in conjunction with its co-generation facility, supplements the grid, generates revenue directly to the Department, and further reduces operational costs. In the continued effort to achieve energy independence, the Department also installed a photovoltaic system that has effectively contributed to reducing the daily energy utility demands at its central maintenance facility.

# Metropolitan Wastewater

## Budget Dollars at Work

- 180 million gallons per day in total sewage flow treated and discharged
- Nearly 3,000 miles of municipal sewer system mains operated and maintained
- 21.5 miles of sludge disposal lines operated and maintained
- 9 miles of ocean outfall lines operated and maintained
- 4 wastewater treatment plants operated and maintained
- 84 Sewer pump stations operated and maintained
- Reclaimed water production capacity of 45 million gallons per day

## Significant Budget Adjustments

### MUNICIPAL SEWER FUND

Wastewater Treatment & Disposal - Muni	Positions	Cost	Revenue
<b>Salary and Benefit Adjustments</b>	0.00 \$	145,499 \$	0
Adjustments to reflect the annualization of the Fiscal Year 2007 negotiated salary compensation schedule, changes to average salaries, retirement contributions, retiree health contributions, and other benefit compensation.			
<b>Most Efficient Organization (MEO) and Bid-to-Goal</b>	0.90 \$	556,868 \$	0
Reduction and restructure to support the MEO process and prepare for Bid-to-Goal.			
<b>Support for Information Technology</b>	0.00 \$	331,128 \$	0
Funding is allocated according to a zero-based annual review of information technology funding requirements and priority analyses.			
<b>Increase to Retiree Health Care-Other Post-Employment Benefits (OPEB)</b>	0.00 \$	34,127 \$	0
Addition of funds to be applied towards the total liability for retiree health care.			
<b>Funding for the Enterprise Resource Planning (ERP) System</b>	0.00 \$	1,170 \$	0
This system will integrate all data and processes of the City's core functions into a unified data system. The ERP will replace independent applications the City has in place that will eliminate the need for external interfaces, provide a range of standardization, reduce maintenance, and allow for greater reporting capabilities.
